EQUITONE

Through-Colour Fibre Cement Panel

Description

EQUITONE is a through-coloured fibre cement cladding designed by and for architects. Every EQUITONE panel is unique, showing the raw, untreated texture of the fibre cement base material. Fibre cement is a cement composite material that consists of cement, cellulose and mineral materials, reinforced by a visible matrix. Nothing else. Visible and invisible fixing methods include riveting, screwing and bonding on metal or wood supporting frames. No matter what design options you explore, the through-coloured nature of EQUITONE assures crisp, monolithic details in a wide range of unique finishes.

Product Benefits

THROUGH-COLOUR MATERIAL
EQUITONE through-colour fibre cement cladding offers elegant shades of natural colour. Every EQUITONE panel is unique, showing the raw, untreated texture of the fibre cement base material.

NON-COMBUSTIBLE
EQUITONE through-colour fibre cement cladding is a non-combustible facade material that can be used internally or externally wherever a non-combustible material is required.

EASY TO CUT & INSTALL
EQUITONE through-colour fibre cement cladding is easily cut to size and installed onsite minimising lengthy lead times between site measure, production and delivery of pre-finished panels.

LOCAL STOCK AVAILABLE
EQUITONE through-colour fibre cement cladding is readily available with over 10 colours in stock Australia wide. Please contact us to confirm the stock range and current available sheet sizes.

REPELS WATER
EQUITONE cladding receives a hydrophobation process which prevents moisture ingress into the core of the panel. This allows the completely raw panel to be exposed to the elements without any treatment.

MAINTENANCE FREE
EQUITONE through-colour fibre cement cladding is a truly maintenance free material with no re-sealing, painting or ongoing maintenance ever required during install or anytime thereafter.

HIGH DURABILITY
EQUITONE through-colour fibre cement cladding is an exceptionally durable panel. Even in the most demanding applications EQUITONE has a life expectancy exceeding 50 years.

VENTILATED SYSTEM
EQUITONE cladding is installed on a ventilated sub-construction system allowing for the building envelope to breathe which increases thermal and energy efficiency and promotes healthier buildings.

Product Range

Availability

DESCRIPTION	SHEET SIZES	LEAD TIME	MOQ
EQUITONE Tectiva TE90, TE10, TE20	2500, 3050 x 1220mm	Stock	1 Sheet
EQUITONE Tectiva TE00, TE15, TE60	2500, 3050 x 1220mm	2-3 Weeks	1 Sheet
EQUITONE Tectiva TE30, TE40	2500, 3050 x 1220mm	14-16 Weeks	40 Sheets
EQUITONE Natura N154, N161, N991, N593, N412, N252, N250, N251, N074	2500, 3100 x 1250mm	2-3 Weeks	1 Sheet
EQUITONE Natura All Other Colours	2500, 3100 x 1250mm	14-16 Weeks	30 Sheets
EQUITONE Lines	2500, 3050 x 1220mm	2-3 Weeks	1 Sheet
EQUITONE Lunara	2500, 3050 x 1220mm	14-16 Weeks	30 Sheets
EQUITONE Pictura	2500, 3100 x 1250mm	14-16 Weeks	30 Sheets
