ULTRASCREEN

Non-Combustible Timber Screening

Description

ULTRASCREEN is an innovative new generation exterior screening product made from highly durable marine-grade aluminium and factory pre-finished using the latest matt-effect technology in 28 realistic timber colours. Deemed-to-satisfy non-combustible in accordance with the BCA/NCC, it has been fully tested in Australia by CSIRO achieving excellent results to AS 1530.1 and AS 1530.3. Eco-friendly, low maintenance and incredibly durable, ULTRASCREEN is ideal for type A and B construction projects such as high rise apartments and bushfire rated areas which require non-combustible screening & gates.

Product Benefits

AS 1530.1 NON-COMBUSTIBLE

ULTRASCREEN is a non-combustible cladding product in accordance with the relevant requirements of the NCC/BCA and has been tested by NATA accredited CSIRO to AS 1530.1 and AS 1530.3.

MARINE GRADE DURABILITY

Along with the marine-grade aluminium base material, the matt-effect ULTRASCREEN coating has undergone extensive durability testing and has been proven to perform in the harsh Australian conditions.

INTELLIGENT PROFILE

The ULTRASCREEN range of profiles have been intelligently designed to provide excellent usability and super fast installation in a wide range of screening applications such as privacy screens, fencing and gates.

EASY INSTALLATION

ULTRASCREEN has different widths making it flexible, fast and easy to install to a simple frame using secret-fix spacers and screws. The spacings between the slats can easily be varied for different aesthetic effects.

VERY LIGHT-WEIGHT

Compared to many other natural timber and composite type screening products, ULTRASCREEN is a very light-weight system offering potential structural advantages and cost savings.

MANUFACTURER'S WARRANTY

Despite the undisputed durability of high-grade aluminium, ULTRASCREEN cladding offers a 10yr manufacturer's warranty on all different finishes for peace of mind and guaranteed performance.

NATURAL AESTHETICS

The beautiful looking finish on the ULTRASCREEN slats is possible because the latest matt-effect coating technology provides incredible richness and variation along with outstanding long-term durability.

COLOUR-MATCHED TRIMS

The ULTRASCREEN system is completed using the proprietary ULTRASCREEN profiles covering all common construction details and finished in exactly the same matt-effect coating for a perfect match.
