MINERAL-BASED COMPOSITE (MBC) DECKING

Since its creation in 2007, Eovations™ technology has perfected the substrate found in several Deckorators® decking products. The unique process starts with a mixture of polypropylene and calcium carbonate that's pultruded, which creates cavitation or tiny air pockets. This keeps the boards lightweight, but with a fiber-like structure similar to wood, providing unmatched strength.

All Deckorators® decking offers:

- 20-year Stain and Fade
- 20-year Structural

When installed by a Deckorators® Certified Pro, all Deckorators decking offers:

- 25-year Stain and Fade
- 25-year Structural
- 25-year Removal & Replacement
