TRAXION

Mineral-Fibre Composite Decking

Description

TRAXION mineral-fibre decking is a giant leap forward in wood-alternative decking. Made in the USA, it has the industry's best strength-to-weight ratio, is incredibly stable and doesn't absorb moisture. The durable polymer cap stock won't stain or fade and it provides the highest level slip resistance when tested to Australian standards. The patented technology creates a fibre-like structure inside the material, similar to wood, giving it unmatched strength and the lightweight boards are easy-to-handle on the job site. Quite simply, TRAXION is the best decking material on the market today.

Product Benefits

EXCELLENT SLIP RESISTANCE

TRAXION mineral-fibre decking achieves the highest possible slip rating of P5 when tested to the latest Australian standard AS 4586 meaning it is NCC compliant for use in all applications.

HIGH STRENGTH TO WEIGHT RATIO

Kilo-for-kilo, TRAXION mineral-fibre decking delivers unprecedented strength and much less density compared to virtually all other composite construction materials.

MAINTENANCE FREE

TRAXION mineral-fibre decking contains no cellulose fibres such as timber or other organic material, has no open porosity structure, and is not degraded by common mould enzymes so simply wipe clean at your leisure.

LOW THERMAL EXPANSION

TRAXION mineral-fibre decking has a far lower rate of thermal expansion than other composites. This dimensional stability is a huge advantage in maintaining performance and appearance.

PIONEERING USA TECHNOLOGY

TRAXION mineral-fibre decking has been developed by Universal Forest Products (UFPI), a listed global company headquartered in USA which has been producing industry leading composite materials for over 50 years.

NO MOISTURE ABSORPTION

Unlike almost all other composites, TRAXION mineral-fibre decking absorbs virtually no moisture; immersion testing shows maximum moisture absorption values of less than 0.2%.

EXTREME STRENGTH

TRAXION mineral-fibre decking has virtually indestructible strength due to its parallel-oriented internal fibre structure that is a remarkable replication of wood's internal structure.

RESISTANCE TO EVERYTHING

TRAXION mineral-fibre decking is resistant to almost everything including UV radiation, chalking, rot, leaching, cracking, denting, scratching, splintering and insect attack.
